Week 2 wrap up

Week 3 Patterns

- Crucial Design Pattern: Server-Client architecture
- Crucial Programming Concepts: HTTP and to a lesser extent OAuth and Regex
- Crucial iOS Pattern: Notification Center (We will go more in depth on this later)

Week 3 Frameworks

- Objective-C System frameworks: Foundation, UIKit
- Cocoa Framework: WebKit

Week 3 UI Techniques

- Custom Transitions
- Animations
- Transforms
- Static Table View

Week 3 Important Classes

- NSURLSession
- NSURL
- NSMutableURLRequest
- NSRegularExpression

Week 3 Swift features

- Ternary Operators
- Generics
- Extensions

Swift next steps

- Enums (we will cover these in obj-c, they are used for the same thing)
- Subscripts
- Generator, Sequence, and Collection protocols
