Programming Concept	Cocoa Features	Xcode/App Structure	Data Structures	Frameworks	Swift Features	Objective-C Features	Persistence	Concurrency	Networking	Testing	Controllers	Interface
MVC	Notification Center	Bundles	Stack	UIKit	Closures	Properties	Core Data	Threading	JSON	XCTest	Network Controller	Table View & Cells
Functional Programming	Date Handling	Asset Catalogs	Queues	Foundation	Protocols	Blocks	NSUserDefaults	NSOperationsQueu	NSURLSession		Navigation Controller	Autolayout
Singleton Pattern	Region Monitoring	Custom URL Schemes	Linked List	Core Data	Generics	Message Sending	NSCoding	GCD	OAuth		UIAlertController	Collection View
Lazy Loading	Local Notifications	App Submission	Arrays	Core Image	Extensions	@ sign	NSKeyedArchiver		Callbacks		UIImagePickerController	Collection View Layout
Relational Databases	Location Manager	App States	Hash Table/Dictionar	Photos	Optionals	ARC & Pre-ARC	Keychain		WebViews		UISplitViewController	Gesture Recognizers
Server/Client		Instruments	Binary Search Tree	AVFoundation	Namespacing	Runtime			NSURL		Tab Bar Controller	UISearchBar
HTTP Protocol		Localization		MapKit	Property Observers	enum			AFNetworking		Custom Containers	Animation
Regex		Debugging		Core Location	try/catch				Status Codes			Custom Transitions
Big O Notation				CoreGraphics					Header Fields			UIScrollView
Broadcast Pattern				Social!!!								Map Annotations
REST API												Map View
Pointers												Map Overlay
Public vs Private												UIImageView/UIImage
OOP												Programmatic Layout
Agile												Nib/Xibs
Unit Testing/TDD												Size Classes
Memory Management												UITextField
Subclassing												UILabel
Immutable vs Mutable												UITextView
Single Responsibilty
